### People on the move – statistics on mobility in Europe

People in today's Europe are on the move much more than ever before. This mobility can be viewed from many angles, as there are many reasons for moving: migration, education, work or tourism… This digital publication **People on the move – statistics on mobility in Europe** shows the latest figures on these movements in many different ways, with a focus on people and not on goods. This digital publication containing short texts, interactive visualisation tools and infographics has been developed by Eurostat.

### The European economy since the start of the millennium - a statistical portrait

This digital publication **The European economy since the start of the millennium - a statistical portrait** aims to show how main features of the economy of the European Union and its Member States have evolved since 2000 through a large range of statistical data giving both a micro- and a macro-economic perspective.

This publication does not describe the short-term trends of the European economy, but its purpose is to answer questions such as: How has our consumption behaviour changed? How has household income evolved? Are working patterns still the same? What is the share of services in the economy? What is the proportion of large enterprises? Has government employment increased or decreased?

### You in the EU

“You in the EU” is a new tool created by Eurostat, the statistical office of the European Union, which has been designed for all European citizens. This infographic provides you with the possibility to compare some aspects of your way of living not only with men and women of your age in your country, but also with the EU average and other EU Member States.

Before you start, you have to select your country, your gender and your age group, which will be used as a basis for comparison.

## Economic trends

The interactive data visualisation tool **Economic trends** provides every user, from basic to professional, a quick and easy overview of the development of 8 main economic indicators.

After selecting an indicator and a country (or the EU / EA aggregate), the trend of the indicator over the last 12 time periods will be displayed in a graph. Additionally, you can add the EU or EA aggregate for comparison.

For some indicators, you have the possibility to swap between units. For example, for inflation you can choose between the "change compared to the same month of the previous year" and the "change compared to the previous month".

Below the graph, you also have the possibility to obtain a definition of the indicator (see "i" button) and to access the source dataset (when clicking on "+ More information).
