
Forms and methodological notes for Providers

Last update:04.01.2021

Statistics on trade in goods between the Slovak Republic and EU Member States are recorded separately for goods dispatched from the Slovak Republic and separately for goods delivered to the Slovak Republic, therefore there are special forms for each flow of goods.

From 1 April 2010, reporting units are obliged to submit Intrastat declaration electronically. The form only serves as a model!

DISPATCH 2021

Form ZO 2-12 / Declaration on dispatch of goods is used by reporting units to submit information on Union goods leaving the territory of the Slovak Republic to a destination in another Member State or in the territory of Northern Ireland, except for goods in transit. The content of these reports is used for statistical purposes only.
